

Thomas Stock

Freelance · Lead Front-end Engineer

Product-minded front-end lead with 20 years of shipping web software, from .NET to React. I own architecture, grow teams and set the conventions that keep a codebase healthy when humans and AI both write the code.

Now

Updated Sep 2026

- Figuring out how *anyone* can ship with AI responsibly: guardrails, review, tests, conventions.
- Researching what a developer's job is now, and what it should be next.
- Leading front-end at Peripass. Making the codebase AI-ready through developer and agent experience: conventions, CI and fast feedback loops.

Experience

Peripass

June 2023 – present

Freelance Lead Front-end Engineer

- Preparing the codebase and team for AI-assisted development: conventions, guardrails and a review flow so anyone can ship with AI responsibly.
- Moving a legacy ASP.NET MVC front-end to React, including a responsive kiosk and mobile web app.
- Rewrote a legacy Xamarin app in React Native.
- Built the UI test framework on Playwright.

Aprimo

2015 – May 2023

Lead React Developer · Joined as ASP.NET developer, React developer from 2017, lead from 2021

- Technical lead for a team of about nine front-end developers: architecture, final pull-request reviews, long-term project health.
- Core architecture and UX guidance for a large enterprise React product.
- Mentored juniors and new hires, ran technical interviews.

React, Redux, Redux-Saga, TypeScript, Material UI, Webpack, Cypress, Jest

Earlier roles

2006 – 2014

Web, Windows and mobile apps on .NET at four companies: CMS implementations, kiosk and point-of-sale software, stock management on barcode scanners.

D Soft, Orbit One, TrustTeam, IndiegrouP

Skills
